

Julia Lösse Oliver Haag Landschaftsarchitekten

PORTFOLIO

The activities of Locodrom cover the process from landscape architecture concepts, open-space design through to all details of implementation. Our objective consists in closely guiding our open space projects through each of their changing scales in close communication with the project partners. This is to ensure that the idea and the quality of a design, a master plan or a strategic model are maintained in every stage of each project.

Locodrom was established in 1999.
